Technical Skills

SQL: Oracle Database, PostgreSQL, SQLite
R: readxl, writexl, dplyr, ggplot2, readr
Python: Pandas, OpenPyXL
Julia:

Work Experience

University of Utah Health   Managed Care Data Analyst   2018 – Present   Murray, Utah

- Manage the ETL process with Fraud, Waste, and Abuse vendor by producing and validating 5 monthly reports; Medical/Dental, Pharmacy, Enrollment, Coverage Attribute, and Provider
- Support the Actuarial team by managing the ETL process with analytics vendor by producing and validating 5 monthly reports; Medical/Dental, Pharmacy, Lab, Enrollment, and Provider
- Produce the annual State of Utah Insurance Transparency report which includes 3 Administrative metrics and 6 Denial metrics. The report is published online and can be found at this link: Insurance Transparency
- Re-wrote the Restricted Surveillance Pharmacy report in SQL and automated the report in Microsoft SQL Server Report Builder saving a total of 8 hours of work a month
- Created the Pended Claims by Workqueues report which tracks the number of daily pended claims over a rolling 6 week history; By tracking pended claims, management was able to reduce the average number of daily pended claims by 4k
- Automated 14 Medical/Dental/Pharmacy, and Enrollment reports saving 40 hours of manual work a month

PNC   Healthcare Solutions Consultant   2012 – 2018   Salt Lake City, Utah

- Developed and administered the annual PNC Healthcare Benchmarking Initiative which benchmarks hospital performance across 15 key revenue cycle metrics
- Developed and administered the annual PNC Healthcare Advisory Board Cash Posting Survey which benchmarks member hospitals across 9 key cash posting metrics. The survey was sent to participating hospital CEOs and the survey results were reported back to the participating hospital CEOs
- Analyzed the virtual credit card payments for a client and estimated that the annual processing fees equaled approximately $75k; Opting out of the top three payment processing intermediaries would reduce the virtual credit card payments by an estimated 93%
- Helped clients consolidate payer lockboxes and ensured that 95% of paper checks were received at the new lockbox
- Created department KPIs which consist of 5 revenue and 6 non-revenue metrics, and developed a process for capturing and reporting performance using SharePoint

Humana   Provider Relations Consultant   2009 – 2012   Sandy, Utah

- Developed and maintained a contract management workflow system using SharePoint which reduced the time required to execute a provider contract from 72 to 11 days
- Analyzed a large claims dataset submitted by a contracted health care provider; they claimed a total of $1.5 million in underpayments; Comparing the provider's dataset with internal documents I was able to measure the underpayments and verified that it was actually $125k, thus reconciling a discrepancy between the payer and provider
